COVID-19

Corporate Testing

STAYING SAFE IN THE WORKPLACE

Regulated by

The Whitehall Clinic

A Private Medical Clinic registered & regulated by the CQC, leading in preventative healthcare and screening.

The Service

Our Gold Standard Covid-19 Testing Programme has been developed by our advisory board consisting of Medical & Occupational Health Doctors, supported by our Laboratory Partner to **minimise the risk** of new SARS-CoV-2 infections in the workplace. **Using the latest guidance, protocols and approved tests** we support organisations of any size. To date, we have carried out 10,000+ tests and managed Covid-19 for organisations from a variety of sectors including Film and TV production, manufacturing, education, professional sports and engineering.

THE LAB

The Tests

Swab Test

Widespread testing with RT-PCR is the Gold Standard for the safest back to work strategy, to detect current infection.

Blood Test

Blood tests for antibodies to identify individuals who have had SARS-CoV-2 in the past.

Our Testing Protocol

The Whitehall Clinic's diagnostic protocols maintain occupational safety in your workplace by:

1. Detecting the virus and diagnosing acute illness
2. Investigating asymptomatic contacts and asymptomatic carriers
3. Assessing immunity within your organization allowing you to plan

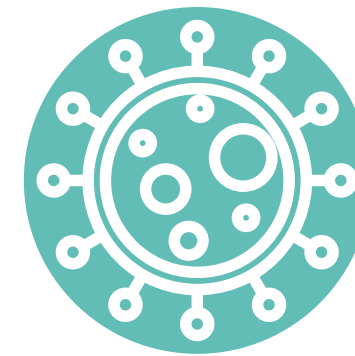

RT-PCR SWAB & ANTIBODY TESTS

Average turnaround time 24 hours

MOBILE TESTING TEAM

Clinic based or on-site testing

TESTING AVAILABLE 7 DAYS A WEEK

Rolled out in 24 hours

PERSONALISED SUPPORT

Full Occupational Health & Management Support

Corporate COVID-19 Testing

1

Find out if employees have had SARS-CoV-2 exposure

Blood Test £99

The blood test for antibodies identifies if an individual has previously had SARS-CoV-2.

Antibodies, especially IgG antibodies, are detectable in most patients from the second week after the onset of symptoms as an indication of previous infection.

Our Covid-19 Lab-Based Antibody tests are of the latest generation and approved by PHE.

2

Test symptomatic and asymptomatic employees to ensure they are not infectious

Swab Test £150

The RT-PCR method tests your employees for existing SARS-CoV-2 infection. It is the most comprehensive approach for detecting infectious individuals by molecular biology technology.

Based on a mouth/nose swab, RT-PCR searches for the virus' NRA. It is the most sensitive test for this purpose -even in absence of the symptoms.

Testimonials

Hear what our clients have to say about how we've supported them in safely returning to work.

“

We used the Whitehall Clinic in Leeds for corporate anti-body testing during the Covid-19 Pandemic. The whole process from start to finish was handled professionally and smoothly. Alexandra (Practice Manager) handled all communication efficiently and Dr Khan and Mr Barszcz were reassuring and thorough. We would highly recommend The Whitehall Clinic for corporate and personal use alike.

- Leon Wheeler, MD

“

The Whitehall Clinic provided on-site Covid-19 testing for the team at BIST. The initial administration stages, testing and aftercare was managed thoroughly and professionally, taking the strain off our internal team.

The testing team were transparent, courteous and really took the time to provide a detailed interpretation of the results to each individual.

- Keith Petty, MD
